REPORT ON ICT PLATFORM USAGE

Epoka University

CANVAS

Canvas charges a one-time implementation fee and an annual subscription fee based on an institution's total number of users.

Canvas offers a free account for teachers, as well as a two-week, free trial with full-feature functionality.

The free teacher account doesn't contain all the options available to paid Canvas users.

Canvas also offers an open-source option for those who want to install it on their own servers instead of using Canvas' cloud.

CANVAS

✓ Only one bid was submitted with a lack of documentation

✓ In the second procedure conducted according to the Purchase Order No.1987 / 20 dated 6 June 2018 and the Invitation to Bid No.1987 / 21 dated 06.06.2018, were invited only the three economic operators mentioned above and only submitted to EO "Adrion" .pk which resulted the winner.

✓ For this purpose supply contracts have been concluded and goods are delivered.

CANVAS

- ✓ Both the paid and the free-for-teacher versions have various features for courses, including:
- ✓ Outcomes – Also known as standards or competencies, Outcomes describe what a learner should be able to do and are used to measure knowledge and ability.
- ✓ Web conferencing – This tool sets a meeting time for the whole class or one-on-one synchronous online discussions.
- ✓ Canvas on mobile – Native iOS and Android apps allow students to take an entire course from their mobile device.
- ✓ announcements.

CANVAS

✓ Canvas Parent – This tool allows parents to engage with their child's education by reviewing upcoming or past assignments, checking grades and receiving course

CANVAS

- ✓ CANVAS is much more user friendly than the Moodle LMS (more like Google Classroom).

- ✓ Almost all the features of Canvas exist in Moddle LMS.

- ✓ Since we have been using Moodle LMS for a long time, our students and instructors get used to it. So, they prefer Moodle mostly.

- ✓ However, we do not restrict our instructors with one system, on the contrary we always support them to try new systems. In our yearly staff training, beside Moodle LMS we added Google Classroom as well.

Electronic Devices Purchasing

- ✓ As a result, CANVAS is becoming one of the most common used learning management system among universities.
- ✓ It is easy to manage for both side (teachers and students).
- ✓ You can easily convert your old fashion classes to online open lectures with videos, assignments, quizzes, forms and share with the world.

- **Number of registered users on Canvas platform (teaching staff + students)**

- List and number of MP courses offered on platform

- List of available learning material (lecture text, presentation, webinar, etc…)

- Comments and discussion

- Delivery date – publication on website

HIGHER EDUCATION TECHNICAL SCHOOL
Courses offered within the platform

COURSE TITLE
Risk analysis in decision making for disaster protection
Investigation of causes, phases and consequences of fire
Personal protective equimpent
Monitoring and control in protection
Applied risk modelling methods
Recycling technologies and renewable energy sources
Risk management in protection
Waste flow management
Elective – Facilities and systems under pressure
Elective – Prevention and control of water pollution
Elective – Design of stationary systems
Elective – Calculation and model of evacuation
Elective – Final master thesis
Preliminary master thesis
Professional master practise 1
Professional master practise 2
LLL Course – Fire and rescue PPE
LLL Course – Evacuation modeling
