## **CANVAS** **learning management system**

CANVAS is a platform of the most modern 'interface', it is extremely easy to use and has all the digital tools that satisfy all the needs of online learning and courses.

Since its launch in 2011 it has been used by more than 1800 universities, school districts and institutions around the world.

On one platform are associated features of all the previous platforms and popular social networks which has led to such an expansion in short time and made world universities convert from existing to canvas platform.

Selected by Cisco Networking Academy (global educational program for career development and IT skills) to power "the world's largest classroom".

Co-funded by the  
Erasmus+ Programme  
of the European Union

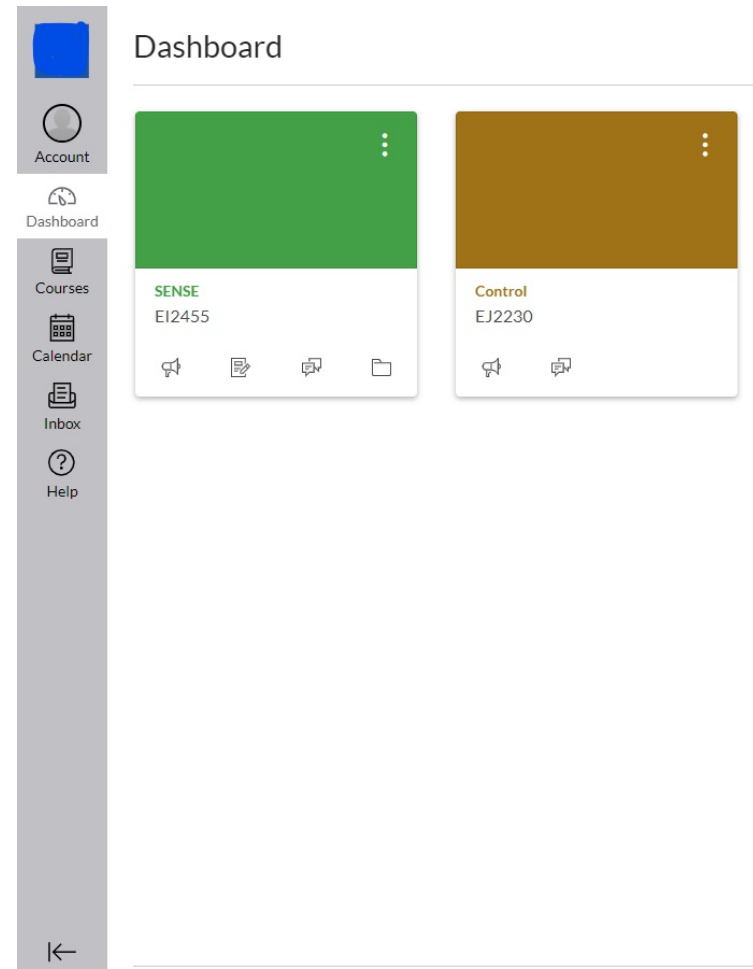

## FEATURES AND ABILITIES

- Compatible with all devices (Android, iOS, Microsoft, web browsers ...)
- Using account on multiple devices at once
- Access for teaching staff (username, password) without the administrator
- Modern interface, extremely easy to use like popular social networks (fb, twitter...)
- Course folders with material for learning, audio and video records ...
- Communication with students via forum (possibility to add video, audio, links ...), e-mail, chat only between two people or more, corresponding with facebook, twitter, google account ..., live streaming...
- No need to use other software to make video or audio recordings. The canvas exist in every window tools for automatic recording and uploading of audio, video and 'white board' records.
- Update on all devices (notifications, calendar, lectures, exams, deadlines, weekly assignments, scores ...)
- Every course has its own news feed, forums for discussion, panel with scores...

## USER EXPERIENCE

-  CANVAS was the learning management system used during my 2-year Master studies
-  The studies were organized and administered through the CANVAS system, including everything from short announcements to project submission
-  The student account contains all the information the students needs for all his/her courses and is easy to use
-  Every subject has its own page in the student dashboard and the teachers are free to organize their page according to their way of working

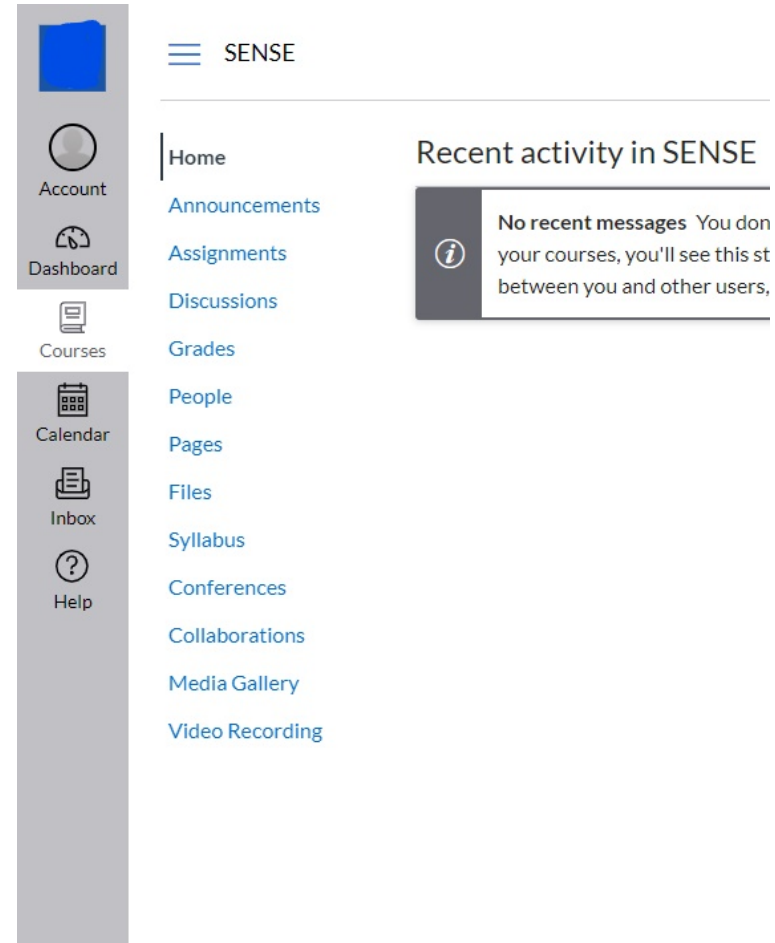

## USER EXPERIENCE

The teacher can add/remove different tabs inside the course page according to the course needs

Standard tabs include Announcements for students, Discussion portal, People enrolled in the course, File repository, Syllabus of the course

The student sets his preference of how to be notified about changes, push notifications, email etc.

A calendar function allows the student to have an overview of current and future workload and tasks

The screenshot displays the SENSE user interface. On the left is a vertical sidebar menu with icons and labels for: Account, Dashboard, Courses, Calendar, Inbox, and Help. The main content area at the top right shows a notification titled "Recent activity in SENSE" with the message: "No recent messages You don't have any courses, you'll see this status between you and other users." Below the notification is a list of menu items: Home, Announcements, Assignments, Discussions, Grades, People, Pages, Files, Syllabus, Conferences, Collaborations, Media Gallery, and Video Recording.

# USER EXPERIENCE

The course can contain various parts such as lectures, exercises, projects and quizzes, which can all be graded
